3. Disposal area boundaries were accurately marked based on the permit. Additional markers were added after the 3/23/2013 audit, according to Mr. Hudson. **Painting the markers with bright paint would make them more visible.**
4. All septage discharges appear to have been made within the disposal area boundary. Field 3 was available to receive waste.
5. Septage has been applied in a manner so that there is no evidence of standing liquid or pooled waste.
6. Waste appeared to be evenly distributed.
7. No objectionable odors were noted at the site.
8. Approved setbacks are being met.
9. The facility appears to be keeping accurate records of land application.
10. Weed control is being used to improve the fescue cropstand.
